

Aristotle 360

Release Notes

06/10/2012

WHAT'S NEW IN THIS RELEASE

1. Enhancements

Legislative Staff in 360

The legislative staff loading process has been updated to clearly designate staff records as legislative staff. Staff records will be associated with the group category "Legislative Staff Group". If a user wants to manually add a new legislative staffer to the database, the user must create an individual staff record for the corresponding staffer and associate that individual with the group category "Legislative Staff Group". Any individual record associated with the group category "Legislative Staff Group" manually or by the weekly automated staff load/update process, shall be considered a legislative staff member by the system.

** Note that the weekly automated staff load/update process does not overwrite any staff records that have been created manually by the user.

The blast email module has been enhanced to ensure it does not send emails to legislative staff who are in the email list and are associated with the group category "Legislative Staff Group". The user can enable the option "Include Legislative Staff" in the blast email module to send emails to any legislative staffers in the email list.
